[Avira APC \(\)](#)

The screenshot shows a Windows desktop environment. In the background, a web browser window displays the 'Software Downloads' page for WhatsApp, with the URL `safedownload.co/whatsapp.php?country=uk&c=brands&adgp=whatsapp&sq=whatsapp%20for%20pc&kw=whatsapp%20for%20pc&mt=e&ad=`. The page includes the WhatsApp logo, the text 'Last Updated: March 18, 2017', and a 'Download Latest Official Version' button. Below this, there is a description of WhatsApp and a section titled 'WhatsApp for Desktop'. A file explorer window is open on the right, showing the 'DOWNLOADS' folder with a list of files including `whatsapp_setup.exe`, `wzdu34.exe`, `whatsapp-messenger.exe`, `avira_pc_cleaner_en.exe`, `anti-malware-setup.exe`, `shade_setup.exe`, `SandboxieInstall.exe`, `Delivery.zip`, and `avira_en_av_58d054b92ae54_ws.exe`. An Avira Protection Cloud dialog box is overlaid in the center, displaying the message: 'Avira would like to analyze the following files in order to improve its security systems.' Below the message is a table with the following content:

Send?	File	Path
<input checked="" type="checkbox"/>	whatsapp-messenger.exe	C:\Users\Spawn\Downloads

At the bottom of the dialog box are 'Send' and 'Cancel' buttons. At the very bottom of the screenshot, a taskbar notification shows 'whatsapp-messenger.exe finished downloading.' with buttons for 'Run', 'Open folder', and 'View downloads'.
